

TEXT SUGGESTION - INFLUENCER

Parallel is that game that comes full of curiosities. The player has the freedom to explore and discover a new planet, a new civilization, know what he does and what are the mysteries of this place.

All this is presented by a mysterious red clown, who accompanies you on this adventure.

By talking and interacting with characters and environments, the player will be able to evolve their character, unlock powers and unravel mysteries.

Immersion is the main part of the game, because at every turn we have something new, some challenge, something that holds our attention. The beautiful landscapes that change throughout the game complement this incredible immersion.

Parallel is not that game with dozens of hours of gameplay, but it brings an adventure with butterfly effects, that is, you can play the same story making different choices and changing the character's destiny, thus knowing other places.

Parallel is being released on Steam for PC, it's a well-polished project that works in both first and third person and can yield good hours of a lot of adventure. Discover the project by accessing the link <https://store.steampowered.com/app/1388350/Parallel/>

PARALLEL - LAUNCH MONTH

Parallel is a first-person (third-person optional) RPG adventure-action game, you will explore a parallel world with a new civilization. Each player will go through different environments, from mysticism, paradise to claustrophobic and destruction scenes.

In the game you will have "butterfly effects". This means that choices are important, a simple yes or no in a conversation can change the entire destiny of your path. Sometimes the choices are unconscious. Small decisions, big twists.

The player can experience many types of emotions. It all depends on what he wants to do in the game. With charismatic characters and specific scenes, this game brings a lot of immersion.

Immersion is definitely the strongest part of this game, moving to mystical and very attractive moments.

After waking up in a very strange situation, the player finds himself in another world, a parallel world that will make the player explore the environment and understand what is happening.

Discover the mysteries of this adventure, welcome to Parallel.

Features

- * A beautiful new world - discover life in this world
- * Your choices determine how you will go on the journey; your decisions have consequences in the plot that offers massive repeatability
- * The player experience and the rich details of the environment are an essential part of this game

RODRIGO BANZATO FACTSHEET

ABOUT ME

Rodrigo has a degree in Industrial Design, worked for game companies and agencies. He has always had games as his greatest passion and since then he has been studying and doing several works related to games.

In 2009 Rodrigo had a great highlight, winning the second prize for best customizable character in the MSCU of Epic Games, with an honorable mention in the creation of a level design.

In 2016, he produced a free game called Clown2Beat, which is available on Steam, also a DLC, Clown2Beat Crazy Circus.

In 2019, together with 3 partners, he produced the prototype of the game Shadows of Kepler, the demo is available on Steam.

His most recent work is the game Parallel and now he wants something more refined and complete.
